Subject: Port Cortlandt--Key Areas of Analysis Technical Memoranda

Good Evening Supervisor Puglisi and Town Board Members,

Attached you will find four technical memoranda in the areas of port operations, traffic, economics and visual impacts. As mentioned in my previous email the noise memorandum and traffic Appendix A will follow next week.

We received new information that we believe will be well-received by the Town regarding our ability to limit the hours of the upland outdoor manufacturing and fabrication activity, which we want to incorporate into our noise memorandum.

We look forward to meeting with Town staff on September 10 to review the contents of our technical memoranda and answer any questions they may have.

We wish you a safe and enjoyable holiday weekend.
